

ODOR ELIMINATOR BLOCKS OCEAN MIST

• Concentrated • Leaves Area Smelling Fresh • Neutralizes Foul Odors

PRAIRIEKLEAN ODOR ELIMINATOR BLOCKS OCEAN

MIST microcells are the nearest thing to a liquid in solid form. They hold practically 100% of their calculable volume of a proven odor counteractant, yet they won't drip or spill like liquids. Nor will they skin over or crust as do gels. Odors float in the air in the form of molecules that when breathed in are identified by minute hair-like antennae.

PRAIRIEKLEAN ODOR ELIMINATOR BLOCKS' space age microcells hold the proven odor counteractant until exposed to the air, then gradually but steadily release it by capillary action, to change the size and shape of the odorous molecule so it is recognized as something different and more pleasant than it would have been.

The microcell blocks are small and compact (2 1/2 x 4" x 1/2") to allow the use of multiple blocks in a single circulator or wall cabinet.

MICROCELLS:

A space age, rigid polymer foam that holds nominally 100% of its dimensional (2 1/2"x4"x1/2") capacity, then gradually and constantly releases its vapors into the air to neutralize foul odors from cancer, chemotherapy and burns centers, human incontinence, animals, decay, bacterial growth, fire, smoke, liquor, beer, mildew, etc.

SPECIFICATIONS:

Appearance.....Block
Odor.....Ocean Mist Odor
Release of Counteractant.....approx. 30-45 days
Specific Gavity.....n/a
pH.....n/a
Boiling Point.....n/a
Flash Point.....n/a
Solubility in Water.....n/a

HMIS	
Health	1
Flammability	0
Reactivity	0
Personal Protection Equipment	A

Product Number: PK-550
