March 3, 2014

Letter of Recommendation:

In 2000 the Neosho R-5 School District chose to bid all custodial supplies, materials and equipment to a one source provider with a three year term. 4-State Maintenance Supply aggressively pursued the first one source bid and was awarded the contract. To date Four State Maintenance Supply has been the one source provider to the Neosho School District.

4-State Maintenance Supply provides many services that go along with their contract. Some of the additional services provided include safety trainings with certifications to our district custodians. Walk through inspections on a regular basis of our facilities to address any equipment mechanical or procedure issues to ensure our facilities meets the high levels of expectation on cleanliness set by the Buildings & Grounds Department. 4-State Maintenance Supply has a full service equipment repair shop that employs factory certified technicians to make any needed repairs to custodial equipment.

4-State Maintenance Supply provides exemplary customer service, and competitive pricing. Their products, training programs, resources, equipment sales and service are just a few reasons why they have been the one source provider at Neosho School District.

In closing Four State Maintenance Supply is proven in our district and I highly recommend them to my colleagues at other school districts.

Sincerely,

Shawn Dilday  
Director  
Buildings & Grounds
