Manufactured by PSiSC®

## BUILT TO LAST A LIFETIME

For over 30 years, PSiSC has been a leading manufacturer of both Phenolic and PolyLife (HDPE) toilet partitions. We're proud to offer our customers and distributors partitions that are built to last a lifetime and require little or no maintenance.

PSiSC utilizes Phenolic and PolyLife materials that resist damage from moisture, vandals, and frequent use. The strength and resilience of our partitions makes them a perfect fit for facilities that regularly experience high levels of traffic.

## PARTITION DESIGN OPTIONS

### MATERIALS

### MOUNTING STYLES

The most popular style of toilet partition, thru bolts and barrels give you the security and strength you need.

The most stable and durable design, this mounting style is good for all areas subject to high usage.

Provide easy access and reduce operating cost of floor maintenance. Requires structural ceiling support and stabilizing bars for extra strength.

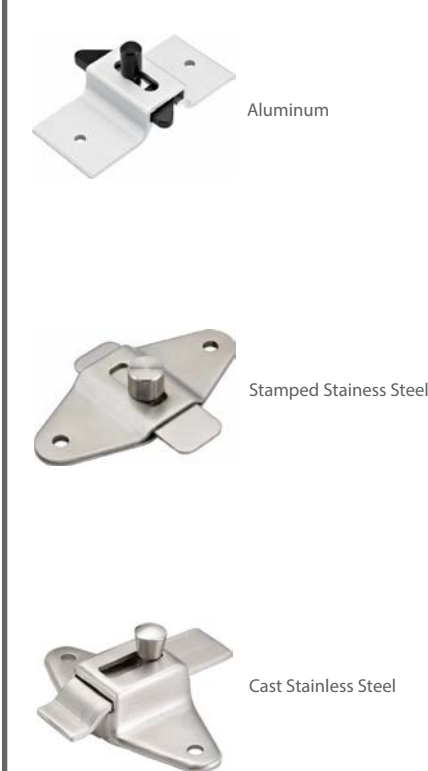

## HARDWARE

*"THE HARDWARE MAKES THE DIFFERENCE"*

# PHENOLIC TOILET PARTITIONS

**"THE WORLD'S MOST DURABLE TOILET PARTITIONS"**

Solid Phenolic is the most durable material in the world for the manufacturing of toilet partitions. PSiSC was the first to introduce Phenolic Partitions to the market. Solid Phenolic is made by applying heat and pressure to layers of paper saturated with a synthetic resin. This causes a fusing process which transforms the materials into a high-pressure thermosetting industrial plastic composite.

## PROPERTIES

- 25 Year Warranty
- Graffiti and Wear Resistant
- Corrosion and Chemical Resistant
- Class A or B Fire Rating
- Multiple Thicknesses for Different Applications
- Multiple Colors
- Scratch and Cut Resistant
- Very Dense and Durable
- Low Maintenance
- Contributes to LEED Certification

69000	All 3/4"	Class A	Heavy use areas requiring stronger side panels & improved fire rating.	3/4"	3/4"	3/4"
62000	1" Pilasters	Class B	Heavy use areas requiring stronger pilasters.	3/4"	3/4"	1"
72000	1" Pilasters	Class A	Most heavy duty series, recommended in high use, low supervision areas.	3/4"	3/4"	1"

## COLUMBIA TERRACORE®

Manufactured by PSiSC®

PSiSC is proud to present a TRUE Solid Color Phenolic Toilet Partition. As a Phenolic material, Columbia Terracore has all of the characteristics of solid core Phenolic. It's durable, water resistant, and has the same color all the way through the material. With multiple earth tone colors to choose from, this durable material is an excellent choice for any project.

## PERSONALIZED PARTITION ENGRAVINGS

Want to take your partitions to the next level? Columbia Partitions is now offering custom engravings for phenolic toilet partitions. Get all of the durability of Solid Phenolic with the added aesthetic appeal of a well-designed partition door.

### CUSTOM DESIGNS

Our design team will convert your school's logo, mascot, or custom graphic into an etched partition.

### COLOR OPTIONS

Choose from one or mix and match a variety of Phenolic color options.

### SIZE & MATERIAL

Made from solid phenolic, all partitions come with cast stainless steel hardware in heights of 58".

# POLYLIFE® TOILET PARTITIONS

PolyLife is a solid plastic material commonly known as HDPE (High Density Polyethylene). This 1" thick material is an excellent choice for toilet partitions, shower stalls, or countertops. This durable material is resistant to graffiti and other damage. It is non-porous and won't delaminate or warp in areas with high moisture.

## PROPERTIES

- 25 Year Warranty
- Graffiti and Wear Resistant
- Corrosion and Chemical Resistant
- Standard Class B Fire Rated Material
- 100% Recyclable Material
- 12 Colors Available
- Non-Absorbent (Excellent for Wet Areas)
- Low Maintenance
- Contributes to LEED Certification

## SERIES OPTIONS

SERIES	DESCRIPTION	FIRE RATING	USAGE	PANEL	DOOR	PILASTER
19000	Standard	Class B	Excellent for areas with high moisture levels.	1"	1"	1"

## MATERIAL BENEFITS

**Want a commercial restroom that offers both beautiful aesthetic appeal and clean, low maintenance requirements?** Columbia Partitions offers HDPE PolyLife partitions that have both of these incredible benefits. Manufactured using non-absorbent solid plastic, a low maintenance material that can be steamed or rised off and graffiti resistant.

- 
**DURABLE**  
 Moisture-proof, chemical and corrosion resistant, a great solution for high-traffic areas.
- 
**LASTING COLOR**  
 Choose from one of 12 beautiful colors - no painting needed and it will not delaminate.
- 
**SAFER MATERIALS**  
 Antimicrobial finish is available to provide an added layer of protection.
- 
**LOW MAINTENANCE**  
 HDPE can be steamed, rinsed, and cleaned using chemicals.

# STAINLESS STEEL TOILET PARTITIONS

Add a luxurious appeal to commercial washrooms with stainless steel partitions. Stainless steel in #4 satin finish offers styles that are both aesthetically appealing and timeless. Our stainless steel material is a great solution for anyone looking to add a beautiful modern feel to any project. These partitions are eco-friendly and contribute to a building's LEED certification.

## PROPERTIES

- Doors, Panels, Pilasters, Urinal, & Entrance Screens are 22 Gauge Type 304 Stainless Steel
- Roll-Formed & Sealed Edges
- Continuous Stainless Steel Interlocking Crown Molding
- Solid Treated Plywood Grab Bar & Door Hardware Reinforcement
- Crown Molding is Welded & Ground at Corners
- 20% Recycled Content Honeycomb Core
- 60-75% Stainless Steel Recycle Content
- Contributes to LEED Certification
- USGBC Member
- Non-Absorbent (Excellent for Wet Areas)
- Low Maintenance
- Contributes to LEED Certification

### DIAMOND PATTERN FINISH

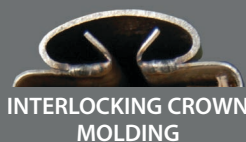

- Graffiti Resistant
- Moisture Resistant
- Higher Resistance to Scratches
- Easily Cleaned and Maintained

### FLOOR MOUNTED OVERHEAD BRACED

Most recommended installation for strength and durability. Headrail offers anti-grip design for safety and vandalism resistance.
